## Simple Techniques for Solving Life Problems

by Ms. Zeljka Roksandic and Dr. Robert V. Gerard

### It's time to... Wake Up!

Stop criticizing and judging yourself!  
Complaining is useless!

Stop criticizing and judging others! You don't get anywhere by making them responsible for your issues, depression or unfair life! It is your creation, not theirs!

*Instead, you can choose to put all your effort in creating a better life for yourself. Maintaining excellent health and a positive attitude can be fast and simple!*

*"...I need HELP!"*

Be it known,  
the brain loves imagery;  
scholars love language;  
poets love brevity; and,  
you will soon love Icons.

### "You Are in the Quick-Fix Generation!"

This powerful book brings you quick-fix solutions for solving life problems. It uses Icons (graphics) and Empowerment Protocols (concise power scripts) for immediate self-healing of fears, burdening beliefs, emotions, cellular memory, and everyday issues. The book demonstrates how you can work at the unseen quantum levels of the body and mind, and expand our consciousness, using intent, imagination, and passion. The techniques are simple, effective, and results oriented.
