unfolding of these dominant themes. These conflicts interfere with energy flow, and at the cellular level, inhibit creative and expressive abilities. The 3<sup>rd</sup> DNA Activation helps you eliminate these restrictions.

### How does the 3<sup>rd</sup> DNA Activation work?

A "Healing Vision of Uniqueness" exists within your DNA. Symbolically coded, it awaits your investigation and eventual retrieval. This process includes direct connection with your Spirit Child. The 3<sup>rd</sup> DNA Activation process guides you to identify and acquire the symbolic code in a sacred and most loving manner.

In the presence of Spirit, after using two beautiful guided meditations and the 3<sup>rd</sup> DNA Activation narrative protocol, you may soon realize greater potential and awareness. Both "alpha" and "theta" mental states are utilized. Once you have connected with your Symbol and Spirit Child Consciousness, questions pertaining to your uniqueness and purpose in life may arise. You will be given a worksheet to guide and journal your notes and questions.

## 4<sup>th</sup> DNA Activation!

The Father-Mother ONE Energy begins to surround you more frequently. The need to be receptive of feminine and masculine energies and their psychological complements arise sharply. The urge for purification increases as well.

### How does the 4<sup>th</sup> DNA Activation work?

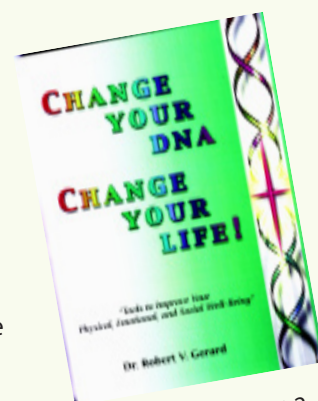

As the integration process unfolds over time, the mental and emotional barriers embedded within the subconscious and unconscious minds with regard to sexual energies will be eliminated. This will result in freedom from sexual dependency, balanced and increased sexual energies, a surge of creative endeavors, and heightened capacity for the reception of your Divine Potential.

It is advantageous to keep an open mind about your sexuality and sexual consciousness. Do not be overtly biased against or judgmental about another gender. To prepare for this activation, one should be well balanced and in good health mentally, physically, socially, and psychologically.
